Outline

Pruning

If you don't end some things you are doing today, the tomorrow you desire may not come to pass. This session will help you decide which of the three "Necessary Ending" scenarios is keeping you from reaching a goal or making a change. Dr. Cloud will discuss how you can make endings normal, align yourself well with them, and possibly even see endings as a good thing! You will be able to apply what you learn to all aspects of life, whether big picture or small, business or personal. Let's get positive about endings - so we can make way for new beginnings.

Small Group Discussion Questions:

#1: How do I feel about endings?

#2: What about the pruning categories? a) good not best; b) sick not getting well; c) dead space

#3: What fears are holding me back?
