

Outline

Henry's Story

Dr Cloud takes us on his own personal journey. Henry believed in God from an early age, but he was not sold out to Christ. He reveals how a series of events changed the course he had planned for his life. A few unfortunate events turned out to actually be opportunities for God to become more real, and for Henry to follow where God was leading. In the process of telling his story, Henry shares some very important principles that will help guide all of us.

Small group discussion questions:

1) Take a personal inventory of the principles Henry listed, and determine where you are in relation to these. Are you actively seeking God?

2) When you don't see God working, do you stay on the path waiting or do you go your own way? Where do you see God showing up - and is there something you need to obey?

3) Are you living life in the context of a community? If so, can the community help and support you more?
