Outline

How Growth Happens

We should all be improving and growing in all areas of life. And yet, each of us has areas that we are stuck in, and the change we desire isn't happening. Sometimes fear keeps us from facing our issues. None of us wants to waste time - but if we're not taking action, we may be wasting not only our time but also our precious gifts and talents. To illustrate this, Dr. Cloud unpacks one of his favorite stories from the Bible, The Parable of the Talents (Matthew 25). This parable is an excellent example of how God sees our growth and what he expects from us. This parable contains a promise; but it also contains a warning.

Small group discussion questions:

1) What parts of your life do not seem to be growing over time?

2) What keeps you from investing in them or using them continuously?

3) How and where will you begin?
