God Will Make a Way-Principle 7: Take Life as It Comes

Although we may be unable to see God's hand in our present situation, He is always with us. Often it is only over time that we see His presence more clearly. When we feel impatient or frustrated, it helps to recognize that time is a necessary part of the spiritual growth process. Time, however, is only one of the aspects of growth in God's plan for us; there are others that are equally important. Join Dr. Townsend for Principle # 7 as he helps us maximize our growth experience, and see that God's hand is in every aspect of our lives.

Small group discussion questions:

1) Do you find that you have a tendency toward a microwave style of growth? If so, where did you learn this?

2) Which of the other ingredients mentioned (time, people, information, and experience) will be most helpful to you in taking life as it comes?

3) Thinking back to the illustration of the seasons, what season of life are you currently in? Does this illustration help you?
